

## NOVIK Z201

The shower cubicle consists of an outward swinging door and a fixed side wall which is held by a 45° or large stabilisation bar.

The Novik symmetrical shower cabins have a classic and at the same time modern appearance. The doors have an open handle and usually open outwards. The profiles are polished aluminium and the 6 mm thick glass is fitted with Riho Shield. Novik guarantees a good price/quality ratio. The cabins and walls are easy to install.

Hardened glass with Riho Shield

Thickness of the glass is 8 mm

The special seal profile position, the glass profile and the glass screen prevent splashing water making its way out.

Door with lift mechanism

Parts are reversible

CE approved, according to EN12150-1

45 Degree stabilisation bar rectangular

Parallel stabilisation bar rectangular
